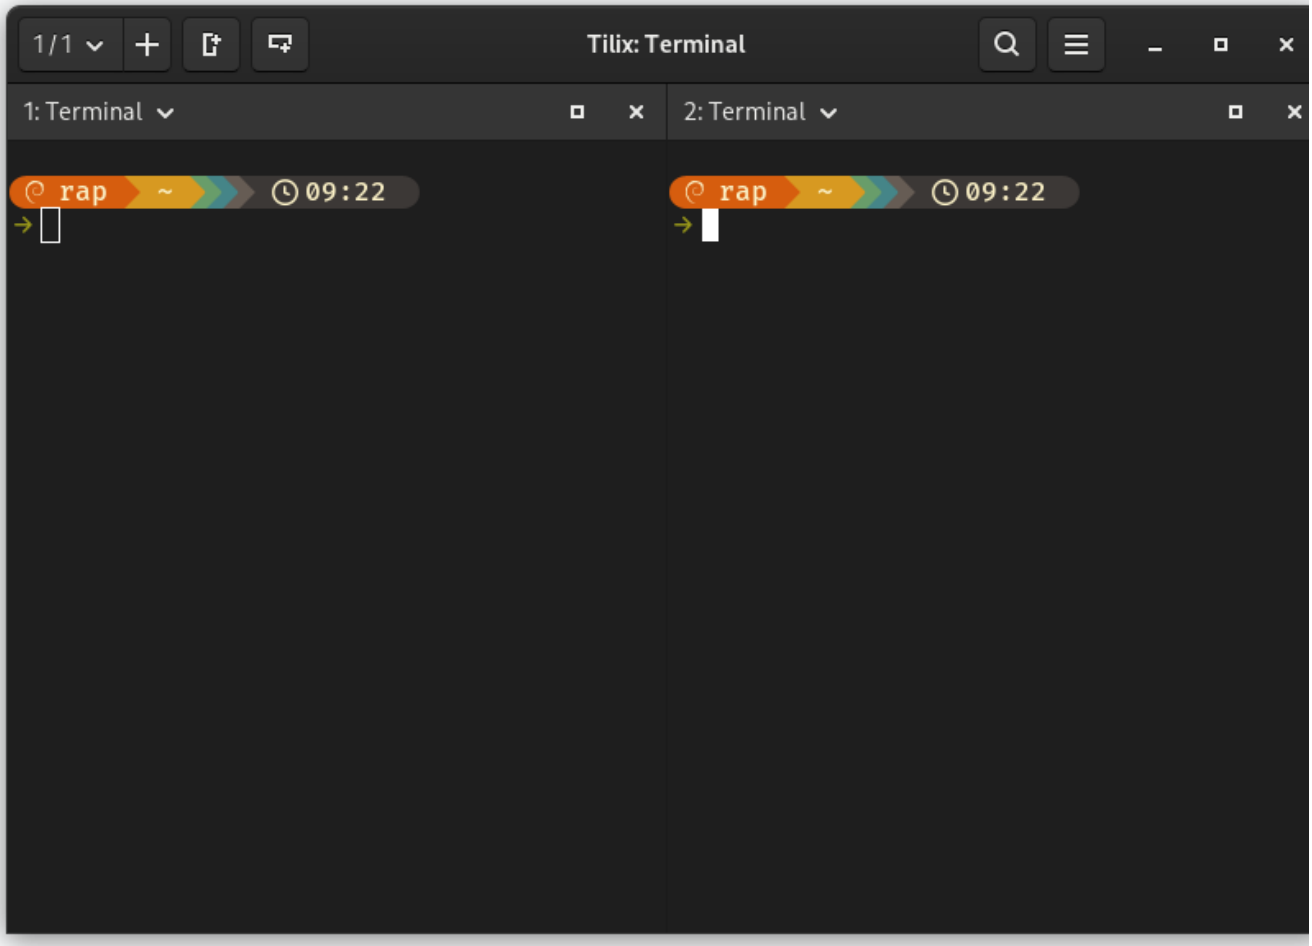
Man page activity

1. Open Tilix and split in 2 vertically



2. Open the man page of the echo command on the right. Use the man page to answer the following questions:
3. Which option of the echo command allows you suppress the trailing newline? Try it out.
4. Which option of the echo command allows you to enable the interpretation of backslashes, and what does that mean? Try it out.
5. Close the man page of the echo command. Open the man page of the hostname command. How do I display all the IP addresses (network addresses) of my machine? Try out the command on the right terminal.

Color Man pages

1. Open the bashrc file with nano: `cd ~; nano .bashrc`
2. Navigate to the bottom of the file using the arrow keys or `Alt` + `/` (or `Esc` key followed by `/`)
3. Type the following lines:

```
export PAGER=most

export MANROFFOPT="-c"
```

4. Save and exit by pressing:
5. CTRL Key + o (letter o)
6. Press enter
7. CTRL Key + x
8. Update your system: `sudo apt update && sudo apt upgrade -y`
9. Install the most pager program: `sudo apt install most -y`
10. Source your bashrc file with: `source ~/.bashrc`
11. Open the man page of any command again. It should look like this:
